About the Conference

Target Audience

This specialized program aims to bring together experts from multiple disciplines to enhance understanding, share advancements, and develop practical skills in managing **dental rehabilitation for patients with complex reconstructive needs**. The workshop will provide **hands-on training** to participants, enabling them to adopt techniques for **dental implant placement in fibula-reconstructed jaws**.

The conference will feature *lectures, case discussions, and video demonstrations* led by esteemed faculty members from various specialties. The workshop will provide an opportunity for participants to apply theoretical knowledge in a controlled and guided setting (Head and Neck Onco-Surgeons, Plastic & Reconstructive Surgeons, and Maxillo-facial Prosthodontist).

Key Takeaways for Participants:

- Fundamental understanding of dental implants in Head and Neck Cancer patients.
- Hands-on experience in placing dental implants in Fibula.
- Practical tips for managing and restoring implant supported prosthesis.

Hands-on Implant placement in 3D printed reconstructed mandible Limited participants!!
